

**COMPANY OVERVIEW**

Track 2 Analytics LLC is a highly specialized, single-principal consultancy delivering **senior-level analytical expertise** to defense and government clients. Founded by **Sean P. McKenna, PhD**, Track 2 solves high-complexity, cross-disciplinary problems across the full analytical lifecycle — from research and prototyping through implementation.

**Verified DoD Prime Contractor** — direct access, no pass-through, trusted by repeat government clients.

**CORE COMPETENCIES**

- **Advanced Analytics & Applied AI/ML** — machine learning, predictive modeling, decision support
- **Modeling, Simulation & Optimization** — operational models, scenario analysis
- **Complex Data Analysis & Visualization** — multi-source integration, dashboards, insight delivery
- **Signal Processing & Sensing Systems** — sensor fusion, detection, classification
- **Scientific & Technical Research** — applied R&D, literature synthesis, prototyping
- **Technical Writing & Communication** — reports, briefings, technical documentation

**PAST PERFORMANCE**

CLIENT / AGENCY	SCOPE OF WORK	STATUS
<b>U.S. Army Engineer Research and Development Center</b>	Advanced analytical toolset development; sensor data processing; threat-adaptive modeling aligned to emerging datasets and best practices	<b>Prime Contract Ongoing</b>
<b>Air Force Research Lab (AFRL)</b>	Applied AI/ML and scientific research support across sensing and data-intensive programs	Past Performance
<b>Defense Info. Systems Agency (DISA)</b>	Technical research and analytical support for information systems and cybersecurity programs	Past Performance
<b>U.S. DOT ITS PMO</b>	Intelligent transportation systems analytics; data modeling and program support	Past Performance
<b>Woods Hole Oceanographic Institution</b>	Complex data analysis and scientific research support for oceanographic applications	Past Performance

*"Track 2 has been invaluable ... consistent, complete, communicative, thoughtful, insightful, on-time, and on budget."*  
— U.S. Army ERDC client

**ADDITIONAL PAST CLIENTS & PARTNERS**

U.S. Army Natick Soldier Systems Center · U.S. Army CERDEC / I2WD · Crosstek LLC · CyberSaint · Safe Security · ADP · Merck · FIRST (Robotics) · Major League Baseball · National Football League · PGA

**WHY TRACK 2 ANALYTICS**

- **Verified DoD Prime Contractor** — Direct engagement, no pass-through, trusted by repeat government clients
- **PhD-Level Cross-Disciplinary Expertise** — Physics, AI/ML, cybersecurity, sensing systems, and R&D in one engagement
- **Full Lifecycle Support** — Research, prototyping, analysis, and delivery without handoff gaps
- **No Overhead, Maximum Value** — Senior expertise only — no layers, no bloat, no ramp-up time
- **Consistent On-Time, On-Budget** — Strong CPARS history and high client retention rate
- **Agile Engagement Models** — Retainer, fixed-scope deliverable, or rapid research sprint — mission-driven
